PENNMEDICINE.ORG/ABRAMSON/BLOODCME
OVERVIEW
This conference is a comprehensive review of hematologic malignancies focusing on the clinical application of new research developments over the preceding year. Didactic presentations will include case discussions with Penn faculty and community experts. The conference format will provide significant opportunity for interaction with expert faculty and other attendees. Participants will leave with up-to-date, practical information which will have immediate clinical application.

LEARNING OBJECTIVES
Upon completion of this conference, participants should be able to:

• Discuss clinical features, including differential diagnoses for the various hematologic malignancies
• Describe recent advances in treatment for the various hematologic malignancies
• Summarize the major patient management issues experienced by the interprofessional care team associated with hematologic malignancies
• Define the state-of-the-art for genomic analyses for hematologic malignancies
• Apply new strategies for incorporating therapies that target metabolism in blood cancers

WHO SHOULD ATTEND
This activity has been designed for hematologists, medical and radiation oncologists, primary care physicians, pathologists, hematology/oncology fellows, oncology nurses, oncology social workers, and other healthcare professionals involved in the treatment of patients with blood cancer.

Please note that most conference materials will be available online. Please bring your electronic device to view presentations in real time.
