New Horizons in Nephrology: Updates in Kidney Transplantation and Onco-Nephrology
Friday, May 5, 2017

Program Overview & Target Audience

Nephrology care continues to be subdivided into subspecialties. In Transplant Nephrology, nephrologists are used for immunosuppression, the decreased donor kidney allocation system has been revised, and novel approaches are being explored to expand the donor pool and improve patient outcomes. Patient care is routinely transferred from the transplant center to local nephrologists following the immediate post-transplant period, and it is increasingly important for local nephrologists to stay current with these updates. Concurrently, major advances in cancer therapies have been made during the last few decades and include dozens of new agents. Many cancers have kidney-related implications, i.e., direct kidney involvement by the cancer, treatment-related kidney toxicities, or chronic kidney disease in cancer survivors. It is challenging for academic and community nephrologists to remain knowledgeable about these advances and the potential impact on the kidney.

This program has been designed for nephrologists and will focus on the latest updates in both areas and the complexity of increasing demands for these physicians to ensure optimal outcomes for some of these challenging patients. A combination of case presentations and lectures will be used to provide an academically sound and clinically relevant review.

Course Objectives:
At the conclusion of this activity, participants should be able to:
- Review hepatitis C-associated kidney disease, including the impact of new direct acting anti-viral treatments, especially as pertains to kidney transplant
- Describe the new kidney allocation system and its goals in improving patient outcomes
- Examine broadened criteria for acceptable donor kidneys including age, disease and suboptimal organ function vs. longer wait for ideal donor organs
- Determine the efficacy and adverse effects associated with induction and maintenance immunosuppression regimens for kidney transplant recipients
- Summarize a combined onco-nephrologic approach to the diagnosis and treatment of the monoclonal gammapathies of renal significance
- Identify the risks and benefits of transplanting patients with a history of cancer
- Explain best practices and challenges of managing patients on the kidney transplant waiting list

Hosting Department and Organization
New Horizons in Nephrology: Updates in Kidney Transplantation and Onco-Nephrology is hosted by the Renal Electrolyte and Hypertension Division of the Perelman School of Medicine at the University of Pennsylvania.

Accreditation
The Perelman School of Medicine at the University of Pennsylvania is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Designation of Credit
The Perelman School of Medicine at the University of Pennsylvania designates this live activity for a maximum of 7.75 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Disclosures
The Perelman School of Medicine at the University of Pennsylvania, Office of Continuing Medical Education, adheres to the ACCME Standards for Commercial Support. Faculty disclosure information will be made available in the conference materials and syllabus. Faculty members are also expected to disclose to participants any discussions of off label and/or investigational uses of pharmaceutical products within their presentations.

Registration Fee
The registration fee for New Horizons in Nephrology: Updates in Kidney Transplantation and Onco-Nephrology is $75 for physicians and other healthcare providers when paying in advance. The fee for nurses is $50. The fee for onsite registration is $90 for everyone.

Registration Fee
- No Charge for Residents and Fellows
- $50 for Nurses
- $90 for everyone

PROGRAM SERIES DIRECTORS
Lawrence B. Holzman, MD
C. Mahlon Kline Professor and Chief
Renal Electrolyte and Hypertension Division

Jeffrey S. Berns, MD
Professor of Medicine
Associate Chief and Renal Fellowship Program Director
Renal Electrolyte and Hypertension Division

COURSE DIRECTORS
Roy Bloom, MD
Professor of Medicine
Medical Director Kidney/Pancreas Transplant Program
Renal Electrolyte and Hypertension Division

Jonathan Hogan, MD
Assistant Professor of Medicine
Clinical Director
Penn Glomerular Disease Center
Renal Electrolyte and Hypertension Division

COURSE FACULTY
Visiting Faculty
Mark Perazella, MD
Professor of Medicine
Yale University School of Medicine
Section of Nephrology
New Haven, CT
Alex Wiseman, MD
Professor of Medicine
Renal Diseases & Hypertension
University of Colorado School of Medicine
Aurora, CO

Benjamin Laskin, MD
Assistant Professor Pediatrics
Division of Pediatric Nephrology
The Children’s Hospital of Philadelphia

Simin Goral, MD
Professor of Clinical Medicine
Kidney/Pancreas Transplant Program
Renal Electrolyte and Hypertension Division

Roy Bloom, MD
Professor of Medicine
Medical Director Kidney/Pancreas Transplant Program
Renal Electrolyte and Hypertension Division

Jonathan Hogan, MD
Assistant Professor of Medicine
Renal Electrolyte and Hypertension Division

Lawrence Holzman, MD
C. Mahlon Kline Professor of Medicine
Chief, Renal Electrolyte and Hypertension Division

Mary Ann Lin, MD
Assistant Professor of Medicine
Renal Electrolyte and Hypertension Division

Matthew Palmer, MD
Assistant Professor
Pathology & Laboratory Medicine
Perelman School of Medicine

David Porter, MD
Professor of Medicine
Hematology and Oncology Division

Peter Reese, MD
Assistant Professor of Medicine
Renal Electrolyte and Hypertension Division

Dundre Savinski, MD
Assistant Professor of Medicine
Kidney/Pancreas Transplant Program
Renal Electrolyte and Hypertension Division

LAURENCE B. HOLZMAN, MD
C. Mahlon Kline Professor and Chief
Renal Electrolyte and Hypertension Division

JEFFREY S. BERNES, MD
Professor of Medicine
Associate Chief and Renal Fellowship Program Director
Renal Electrolyte and Hypertension Division

JONATHAN HOGAN, MD
Assistant Professor of Medicine
Clinical Director
Penn Glomerular Disease Center
Renal Electrolyte and Hypertension Division

Marilene Basin, MD
Assistant Professor of Medicine
Chief, Renal Electrolyte and Hypertension Division

Christopher A. Coates, MD
Assistant Professor of Medicine
Hypertension Division

Laura A. Diamond, MD
Professor of Medicine
Renal Electrolyte and Hypertension Division

Mary Ann Lin, MD
Assistant Professor of Medicine
Renal Electrolyte and Hypertension Division

Matthew Palmer, MD
Assistant Professor
Pathology & Laboratory Medicine
Perelman School of Medicine

David Porter, MD
Professor of Medicine
Hematology and Oncology Division

Peter Reese, MD
Assistant Professor of Medicine
Renal Electrolyte and Hypertension Division

Dundre Savinski, MD
Assistant Professor of Medicine
Kidney/Pancreas Transplant Program
Renal Electrolyte and Hypertension Division

Timothy J. Sheehan, MD
Assistant Professor of Medicine
Renal Electrolyte and Hypertension Division

Lawrence Holzman, MD
C. Mahlon Kline Professor of Medicine
Chief, Renal Electrolyte and Hypertension Division

Mary Ann Lin, MD
Assistant Professor of Medicine
Renal Electrolyte and Hypertension Division

Matthew Palmer, MD
Assistant Professor
Pathology & Laboratory Medicine
Perelman School of Medicine

David Porter, MD
Professor of Medicine
Hematology and Oncology Division
